

BNF Tools Known Problems

Validation:

1. Equal Rule Problem: only rules that are no permutation are equal: `a ::= "foo" | "bar"` `b ::= "bar" | "foo"`

These Rules do not count as equal!

2. Equality of rules does not contain the check for whitespaces in tokens: `a ::= "foo bar"` `b ::= "foobar"`

These Rules count as equal!

3. The Rule `checkSubruleDuplicates` has not been migrated from the last version.

Refactoring/Quickfixes?:

1. `AutoEnumeration`, `fixRemovePassthroughRule`, `fixInlineRuleReferencedOnce` have not been migrated.

Generation:

1. Generation extension (Button or menu) does not work
