BNF Tools Known Problems

Validation:

    1. Equal Rule Problem: only rules that are no permutation are equal: a ::= "foo" | "bar" b ::= "bar" | "foo"

      These Rules do not count as equal!

    2. Equality of rules does not contain the check for whitespaces int tokens: a ::= "foo bar" b ::= "foobar"

      These Rules count as equal!

    3. The Rule checkSubruleDuplicates has not been migrated from the last version.

Refactoring/Quickfixes?:

    1.AutoEnumeration,fixRemovePassthroughRule, fixInlineRuleReferencedOnce have not been migrated.

Generation:

    1. Generation extension (Button or menue) does not work
