BNF Tools: Known Issues and Limitations

Validation:

1. Check equal rules: only rules that are no permutation are equal:
   - ♦ `a ::= "foo" | "bar"` and `b ::= "bar" | "foo"` do not count as equal!

2. Equality of rules does not contain the check for whitespaces in tokens:
   - ♦ `a ::= "foo bar"` and `b ::= "foobar"` do not count as equal!

Generation:

1. Generated output does not include headings or includes from other files
