## **BNF Tools: Known Issues and Limitations**

## **Editor:**

1. \ currently serves as an escape character in strings, thus it needs to be escaped by a double backslash - \\, e.g. "\"=> "\\"

## Validation:

- 1. Check equal rules: only rules that are no permutation are equal:
  - ♦ a ::= "foo" | "bar" and b ::= "bar" | "foo" do not count as equal!
- 2. Equality of rules does not contain the check for whitespaces in tokens:
  - ♦ a ::= "foo bar" and b ::= "foobar" do not count as equal!

## **Generation:**

1. Generated output does not include headings or includes from other files
