

BNF Tools Known Problems

Validation:

1. Equal Rule Problem: only rules that are no permutation are equal:

a ::= "foo" | "bar"

b ::= "bar" | "foo"

These Rules do not count as equal!

2. Equality of rules does not contain the check for whitespaces in tokens:

a ::= "foo bar"

b ::= "foobar"

These Rules count as equal!

3. The Rule checkSubruleDuplicates has not been migrated from the last version.

Refactoring/Quickfixes:

1. AutoEnumeration, fixRemovePassthroughRule, fixInlineRuleReferencedOnce have not been migrated.

Generation:

1. Generation extension (Button or menu) does not work
