

BNF Tools: Known Issues and Limitations

Editor:

1. \ currently serves as an escape character in strings, thus it needs to be escaped by a double backslash - \\, e.g. "\\="=> "\\\""

Validation:

1. Check equal rules: only rules that are no permutation are equal:
 - ◆ a ::= "foo" | "bar" and b ::= "bar" | "foo" do not count as equal!
2. Equality of rules does not contain the check for whitespaces in tokens:
 - ◆ a ::= "foo bar" and b ::= "foobar" do not count as equal!

Generation:

1. Generated output does not include headings or includes from other files
