Welcome to Trac 1.0.1

Trac is a **minimalistic** approach to **web-based** management of **software projects**. Its goal is to simplify effective tracking and handling of software issues, enhancements and overall progress.

All aspects of Trac have been designed with the single goal to **help developers write great software** while **staying out of the way** and imposing as little as possible on a team's established process and **culture**.

As all Wiki pages, this page is editable, this means that you can modify the contents of this page simply by using your web-browser. Simply click on the "Edit this page" link at the bottom of the page. <u>WikiFormatting</u> will give you a detailed description of available Wiki formatting commands.

"<u>trac-admin</u> *yourenvdir* initenv" created a new Trac environment, containing a default set of wiki pages and some sample data. This newly created environment also contains <u>documentation</u> to help you get started with your project.

You can use <u>trac-admin</u> to configure <u>?Trac</u> to better fit your project, especially in regard to *components*, *versions* and *milestones*.

TracGuide is a good place to start.

Enjoy! The Trac Team

Feature List

Starting Points

- <u>TracGuide</u> -- Built-in Documentation
- <u>?The Trac project</u> -- Trac Open Source Project
- <u>?Trac FAQ</u> -- Frequently Asked Questions
- <u>TracSupport</u> -- Trac Support

For a complete list of local wiki pages, see <u>TitleIndex</u>.
