# BNF Tools Known Problems

## Validation:

1. Equal Rule Problem: only rules that are no permutation are equal:
   a ::= "foo" | "bar"
   b ::= "bar" | "foo"

   These Rules do not count as equal!

2. Equality of rules does not contain the check for whitespaces int tokens:
   a ::= "foo bar"
   b ::= "foobar"

   These Rules count as equal!

3. The Rule checkSubruleDuplicates has not been migrated from the last version.

## Refactoring/Quickfixes:

1. AutoEnumeration ,fixRemovePassthroughRule, fixInlineRuleReferencedOnce have not been migrated.

## Generation:

1. Generation does not include headings or includes from other files
